

Density map of severe (severity 3 & 4) accidents

[This is an interactive map. Clicking on a state will display that state's accidents bar graph by city]

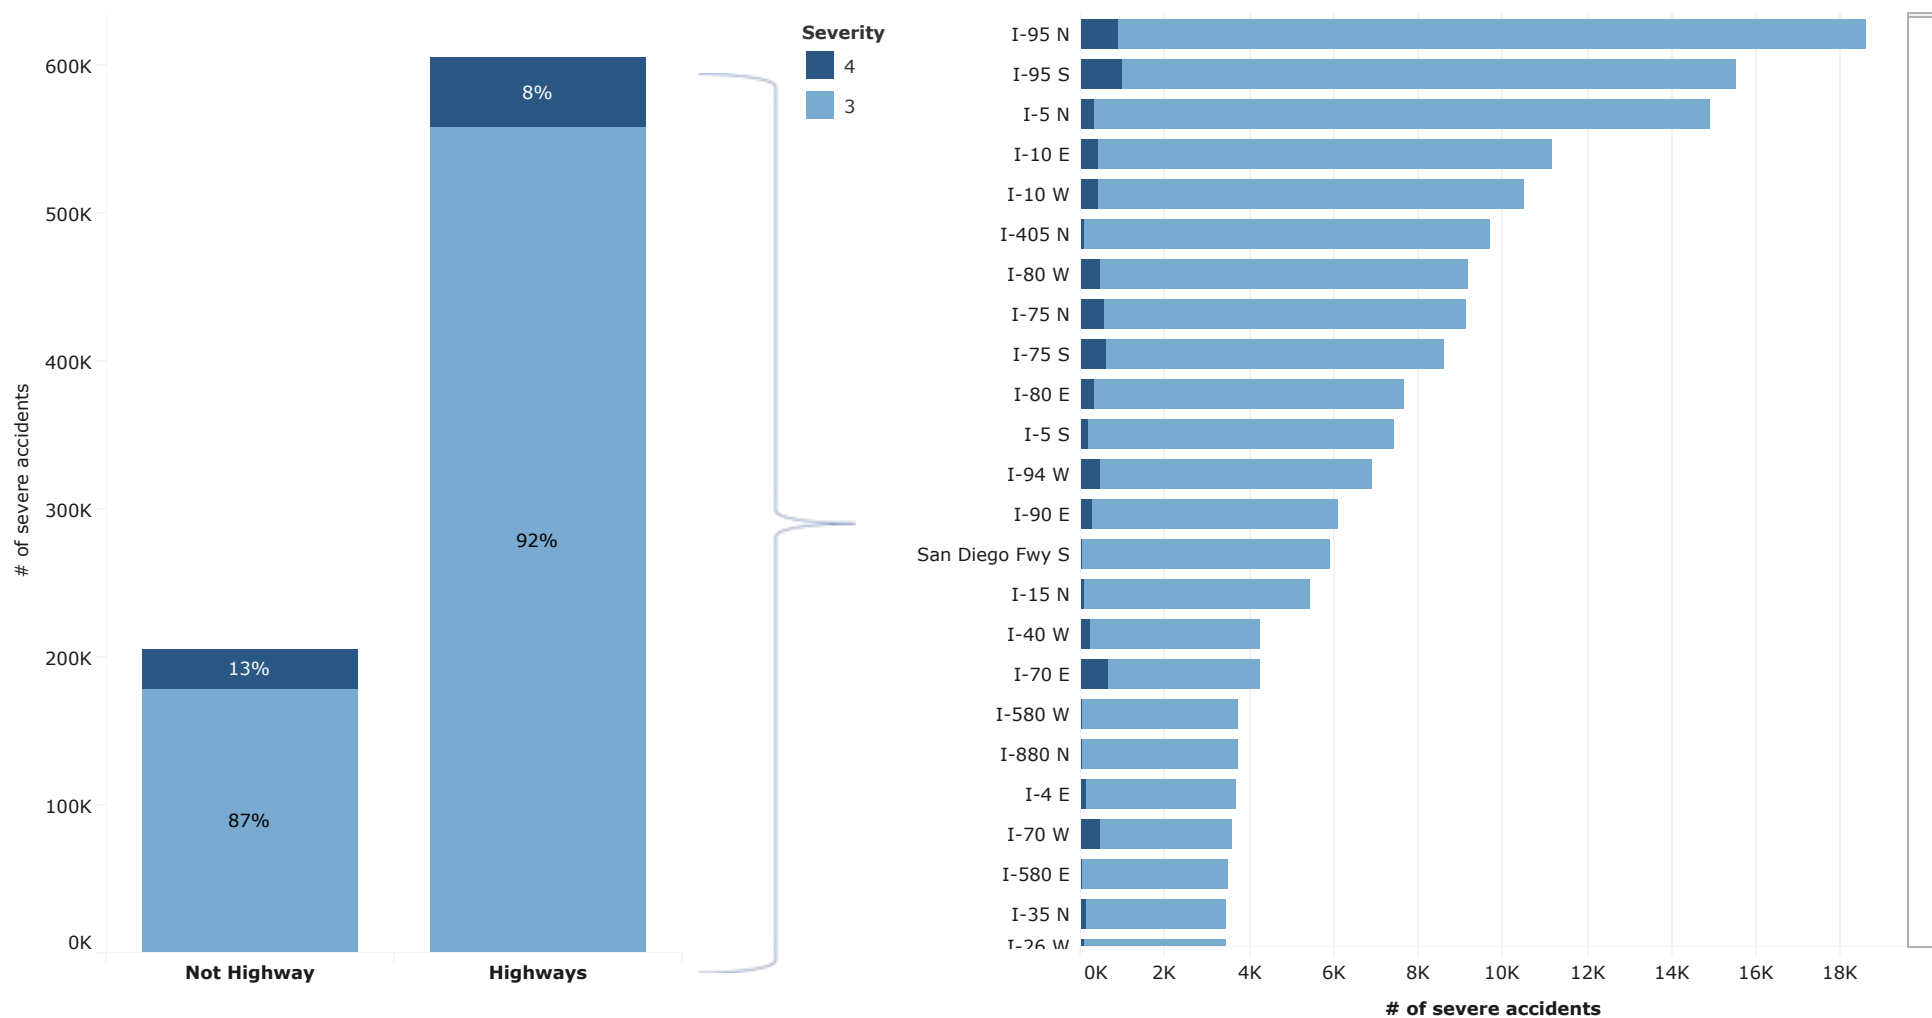

All State

Cities with most number of severe accident delays

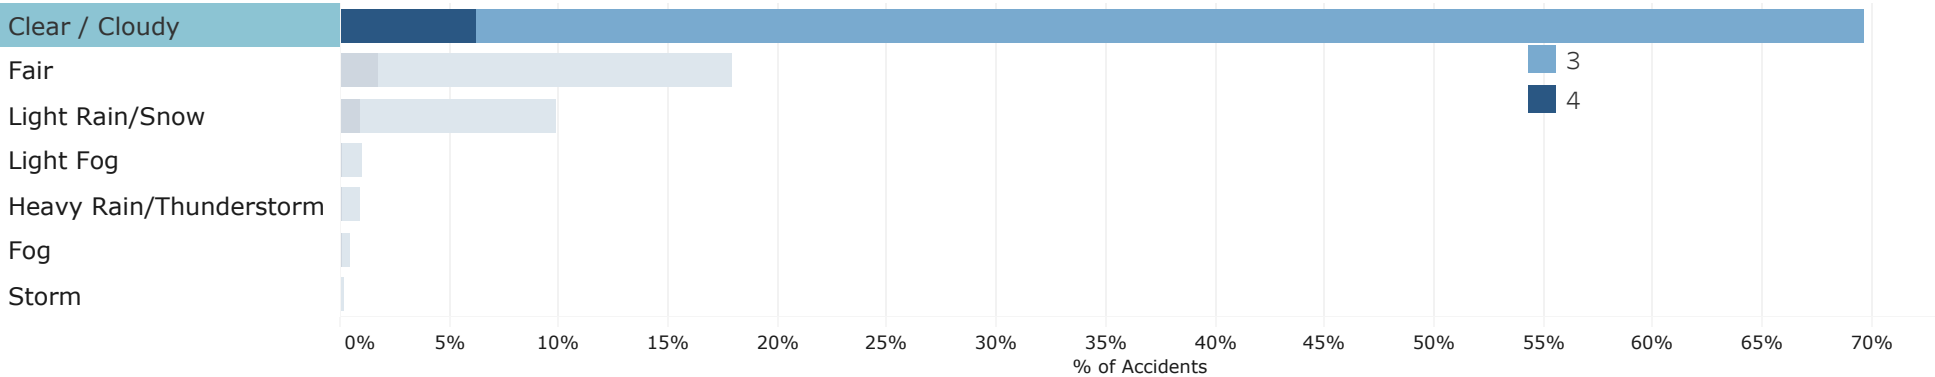

Highways have more accidents with high severity delays

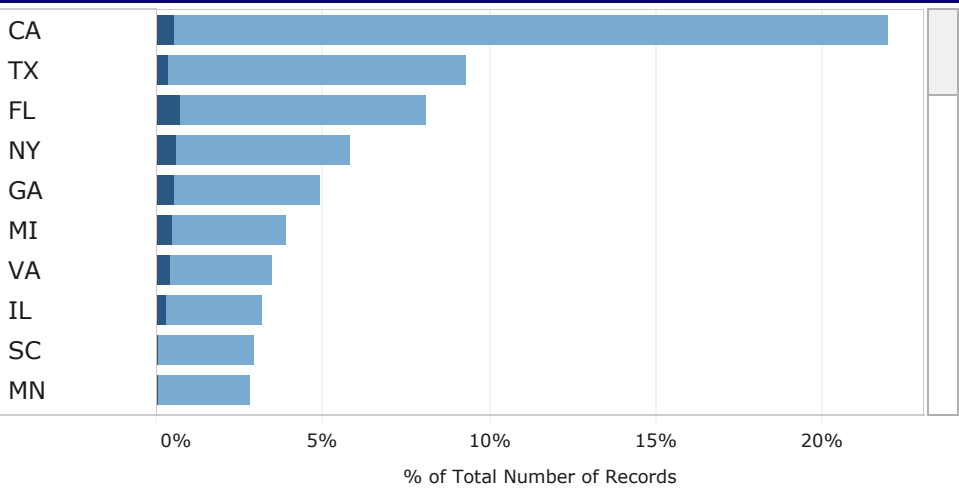

Severe Weather Conditions do not seem to be causing high traffic delay (severity 3 & 4) accidents

More severe accidents on Clear / Cloudy days, vs. less on severe weather condition days such as Storm, could be due to more traffic on roads on good days and less on bad weather days.
